

Our emergency package - well prepared in the event of a search

In the event of a search by antitrust or law enforcement authorities, those affected often panic. Mistakes are made in such situations. These can only be avoided by being well prepared for the search situation. Menold Bezler prepares you comprehensively for an emergency and provides you with the necessary documents.

Our emergency package includes the following components, each of which can be booked separately:

- **Emergency plan:** Instructions for the correct behaviour in the event of a search, internal communication plan, instructions for reception, sample wording for responding to press enquiries, provision of a seizure protocol.
- Support in the development of an **internal process plan** for the involvement of responsible departments within the company and external lawyers.
- **Training of employees** in the event of a search, if desired also with simulation of a search (mock dawn raid).
- **Availability of specialised lawyers** between 6 a.m. and 10 p.m. in the event of a search (emergency telephone number); personal support on site (priority of the search over all other mandates).
